

Next generation fibre internet

Fibreline from Gradwell provides you with a dedicated fibre connection direct from your local exchange.

We understand that to a business with high levels of internet usage, a fast, reliable connection to the internet is critical. If you are using Business VoIP services, receiving or sending large number of files via the Internet, or providing internet services to your customers, consider future-proofing your connectivity with Fibreline from Gradwell.

Fibreline dedicated connection	<ul style="list-style-type: none"> • From £6,900 per year
Installation options	<ul style="list-style-type: none"> • 1 year contract: £3,000 - £4,000 • 3 year contract: £1,000 - £2,000
Service level agreement (SLA)	<ul style="list-style-type: none"> • 4 hour response time
Capabilities	<ul style="list-style-type: none"> • Superfast internet connection • LAN/Interconnect between offices

All prices are excluding VAT. Mbps refers to Megabits per second

Key features

Unlike other fibre based options, Fibreline does not rely on traditional copper infrastructure. Instead it uses next generation fibre optic cables direct from the exchange to your business premises. This means that distance from the exchange, contention ratios and age of the line no longer have an impact on the quality of your vital connection to the internet:

- Next generation internet - direct, dedicated fibre optic cable connection
- Data at the speed of light – distance from the exchange not an issue
- Choose the speed you want to receive – from 10Mbps to 100Mbps
- Symmetrical upload and download speeds
- Service Level Agreement – 4 hour emergency response time

Pick your speed and that is the speed you get. No variable factors. No 'up to' claims. Just the speed your business needs, when you need it

- **Next generation - now**
Eliminate reliance on older copper infrastructure with superfast fibre installed directly into from the exchange
- **Pick your speed**
Choose from 10Mbps to 100Mbps – and that's the speed you receive. No 'up to' claims.
- **Symmetrical speeds**
Fibreline provide the exact same speed for both sending and receiving data
- **All the data you need**
Data allowances are a thing of the past. Use as much data as your business needs, whenever you need it
- **Enhanced service levels**
Service level agreement means that all faults get a response within 4 hours
- **No phone line needed**
Unlike ADSL, Fibreline bypasses telephony infrastructure, meaning no need to pay line rental

Enjoy next generation 100Mbps internet, direct to your business premises from the exchange.

Next generation fibre internet

Features	10Mbps (10Mbps bearer)^	10Mbps (100Mbps bearer)^	20Mbps (100Mbps bearer)^	30Mbps (100Mbps bearer)^	50Mbps (100Mbps bearer)^	100Mbps (100Mbps bearer)^
Yearly cost	From £6,900	From £7,500	From £8,060	From £9,200	From £9,750	From £12,500
Setup options	<ul style="list-style-type: none"> 1 year contract: £3,000 - £4,000 3 year contract: £1,000 - £2,000
